Command Line and Understanding Django

Part 1

- *Create a new folder on your Desktop or in any directory called M02_CL_Test*
- *Using the command line do the following (make sure that you can scroll through the commands, or keep the commands you use all on one screen):*
  - *Create a new folder in the directory called First-Folder*
  - *Navigate to First-Folder and create a new txt file named first-file.txt*
  - *Copy first-file.txt and name it move_file.txt*
